

A stylized landscape illustration in shades of orange and blue. The top half features a light orange sky with a large orange sun. Below the sky are rolling hills and mountains in various shades of orange. The bottom of the image is a solid dark blue horizontal band.

MOVING MOUNTAINS

#CLIMATECONFLUENCE

UNIVERSITY OF CALGARY CAMPUS

October 28

Hunter Student Commons Building

Hosting

Moving Mountains is a choose your own climate confluence where participants can learn about climate change and how they can create and take actions to reduce or prevent harm.

MM is for Activators, Hosts and Participants. It is to build community, collaboration, and leadership through participatory learning. Hosts support activators, event staff, and participants during the various confluence programs.

Moving Mountains is using the mindset of Popular Education for all of our programming

Pop Ed

- Peer - peer
- Experience based
- Practical vs theoretical
- Active / participatory
- Knowledge comes from those learning
- Makes social change - it's a tool of revolution!

Hosting

- Sign in with the Confluence Host 30 minutes before your Hosting block starts.
- Pick up your hosting package and meet any co-hosts or activators that you are supporting
- Be present for the entire program block that you are hosting
- Sign out with the Confluence Host 30 minutes after your Hosting block ends, and let us know how it went.

Hosting

- Fill out your name tag and wear it so that everyone at the Confluence knows that you are there to support them.
 - Carry a pen and paper
- Carry a few extra copies of the program to give out
 - Put your phone to silent, and put it away so you can be fully present as a Host
- Stay curious, and start every interaction with a yes.

The background features a stylized mountain range in various shades of orange and peach. The mountains are layered, with some in the foreground being a darker orange and others in the distance being lighter. The overall style is flat and graphic.

Lets go and
Move Mountains!
